- 66% had completed at least Grade 9.
- 78% reported they were currently students.
- 24% were employed part-time and 5% were employed full-time.

Reason for Treatment

As part of their initial assessment, clients receiving assistance from AADAC are asked to identify why they are seeking treatment. Most clients at AADAC youth services for their own use were looking for treatment related to their use of other drugs (82%) or alcohol (47%). Fewer clients were looking for treatment related to tobacco use (14%) or gambling (1%).

Figure 1: Reason for Treatment

Alcohol, Tobacco and Other Drug Use and Concern About Use in the 12 Months Prior to Treatment

Clients receiving youth services for their own use most commonly reported using alcohol (91%), marijuana (89%) and smoked tobacco (73%). These were also the substances reported most frequently as a concern. Fewer youth clients reported using psychedelics (44%), cocaine (27%) and opiates (14%).
