

LEGISLATURE NEWS

THE ONE, THE INVINCIBLE

By Atlant Braimi

The one the invincible, do you wonder what it is?

You know there's a place in the legislature where they hire hackers for security? What for... let's find out!

I've found out who they are, I.T.S computer they're in the legislature in the annex building with all those monitors controlling that website invisible from scams and hackings including viruses and Trojans!.. They sometimes hire hackers to even do what? Now you know- for security - so if he/she can't hack into the computer then they try 3 or, 4 hackers to see if it's easy or hard. If it's easy and if they get hacked then they try to get a professional hacker to try to get it back.

Sometimes they have easy passwords and that's okay because the hired hacker will tell them the I.T.S computer people will change it.

What if the hacker hacked the computer and didn't give it back and told them that it was good?

DISAPPEARANCE TO THE LEGISLATURE

By Anthony Sebastian.

Starting on the 4th of October, the Kameyosek grade 6 class disappeared to the Legislature for one week. During that week the kids participated in a large quantity of activities and journal their experiences. One of the things they did in particular was the chief electoral office visit. The chief is Sean, who visited the children. The kids were with their teacher, Nova Gould. The field trip was made possible by the Parent Advisory Council in an attempt to extend the children's knowledge. The result was a success, the kids did in fact expand their knowledge. If you were to arrange this field trip, would you agree that you think it would expand the kids knowledge???

WHAT WOULD YOU DO FOR SAFETY?

By: Gurkaran Cheema

Every day we face a risk on violence and danger having someone there would make you feel a little more comfortable especially at the Legislature.

Chief security guard Jonathon is a man that makes you feel a safer. Each day he secures the area, everything from armed and dangerous to inappropriate and disturbing. Not only does he

secure the building but he's also a handy helper he picks up and drops off offenders. He was telling us a story on how he rushed to Lieutenant Governors house because he was locked out and Jonathon had to deliver the spare key.

There are people who do a lot for our province and Jonathon is one of those people. So what would you do for safety?

LEGISLATURE IN A MILLION PIECES

By John Barnhardt

I could not believe my eyes when I saw what was before me. It was the legislature in a million pieces. The small scale replica was made entirely out of Lego bricks.

The estimated amount of bricks including Lego men is one million. This astonishing work of art was fully finished in two thousand and five or five years ago. It truly is a master piece, the creator got down to every last detail inside and out.

I could not imagine what would happen if it were to collapse and at that very moment I would say "It is the legislature in a million pieces!"

BEHIND THE SCENES AT THE LEGISLATURE

By Kim

After hearing that a small grade sixes had a field trip to the Legislature, you might have some questions. Well I am only writing to answer behind the scenes questions.

There is a lot of answers to: "Who does all this?" There is a lot of jobs. Such as plumber, gardener, chiefs, and much more! They have jobs all around the Legislature grounds. You cannot see them but they are there. They do it so that the Legislature can stay the way it is for many more years to come. They are doing it right now! You may only see the janitor. But you cannot see the ones in the basement or the ones on the roof. If they were not here the Legislature wouldn't have most of their priceless artifacts.

In conclusion you should thank the people. Because without them, you would not see all the Beautiful things..

HISTORY OF THE MACE

By: Michael Cheng

A powerful tradition holds that parliament cannot sit without a mace . In 1906 they had to get a mace in a hurry no time for fancy stuff Alberta's first mace was made by a plumbing pipe , shaving mug ,handles and scrapes of wood s painted gold the assembly used it for 50 years !!!!!!!! in 1956 the union of provincial employees gave the province a new mace made of 200 ounces of silver coated with gold

engrave with Alberta's emblems and the mace spell's Alberta they are amethyst ,lapis lazuli ,beryl, emerald, ruby , topaz and aquamarine the coats of arms of Canada

THE SARGENT- AT- ARMS

By Stefano Silva

I am going to tell you about the sergeant at arms I want to tell you about the legislature and I learned that his the only one and only allowed to hold the mace with white gloves

I think it would be very heavy to hold the mace on your back.

Being the sergeant at arms is hard work because when you have to hold the mace for a long time to put it on the table. Its

hard work being the sergeant at arms. I hope you

guys go to the legislature so you can see what I learned. Well, I hope you go!

GRADE SIXES INTO COMMUNICATION

By Tanis

Grade sixes go to school at the Legislature. While they are there each and every one of them make a speech. So they all got in four groups and made a speech. One group made a speech about the Christmas lights outside the Legislature and what will be there and what will happen. Another group made a speech about Canada Day in the huge field down behind the Legislature. Another one is about the Queens trip here in Edmonton. Did you know it would take three to two years of planning for her trip?

I have a few questions to ask you. So why would you do this? Do you do it so the kids could be better advertisers?

If a class is doing a bake sale and doesn't know how to advertise will you be able to help them? Who else would do this for kids to help them to be more and better advertisers? Do you do advertising for these events? If you are not available and you are already helping a class where else can I find someone like you and when could you be available?

Do you just help the kids that go to school at the Legislature? How do you help them be better advertisers?

If you could do another event like this would you? ☺

GRADE SIXES RULE FOR A DAY

By Shayla Corrodas-Brown

Gr.6 students learn the value of Government and the process to making a law.

On October 5th 2010 at 10:30 am the grade six class of Kameyosek School arrived at the Mock Legislature. Earlier that morning these students awoke excited for their day ahead. They reached school and headed for the bus. Once they arrived at the legislature they went into their classroom. They got settled and pul

led out their scripts and practiced their lines. They went over them again and again. Soon they

had them memorized and were on their way down the ped-way to Mock Legislature room. When they got there they were whisked inside. They put on their costumes so they could look Federal. They said their objective was violent video games and called it the v.v.g act bill104.

They also said that if their law (fake) passed then there will be a safer, cleaner environment for everyone. This class practiced everyday in class and even switched parts around several times. They couldn't have worked harder.

After a full week of fun and excitement they knew they had quite a story to tell. So would you ever want to tell a story like this too?

A Mock media scrum.

Member's Way Makes History

Come Alive

By: Aiman

Who would have thought 11 and 12 years old could learn so much about Canadian history. On October 8 2010 Kameyosek Elementary school grade 6 students learn about legislature assembly's that started in 1905. That was the first legislature assembly. We learned about Canadian history at the legislature building in the member's way where old pictures are hanged in a long hallway of history. The information is fun and interesting to learn about.

Why we had to learn about Canadian history, it was to learn how things ran in the past. There was never technology back then so they had to use creativity to invent something like in 1909, men from Nova Scotia made silver dart an airplane that was heavier than- air- machine in Canada. It was useful transportation that had no engine. Learning about Canadian history gets my mind full of questions. My questions are why was life so hard back then? Why was there no technology? How did the world change into a better place? I can get all my questions answered at the legislature in the member's way.

If I had more time I am positively sure that I could get more information and answers for my question.

Here a question. What do you think is the purpose of learning about Canadian history?

TREES AND PLANTS MAKE LEARNING FUN!

By: Haleema Pannu

Imagine someplace so beautiful that you want to explore it. Have you ever thought about going to the Legislature grounds?

A group of grade 6 students from Kameyosek School explored and learned about the Legislature grounds with their tree guide. They

learned about the variety of plants and trees and how they came to be on the grounds. Learning continues as they discovered a totem that came from B.C., an eternal fire, statues, petrified wood, the cannons, history and various family activities that happen on the grounds. This tour of the grounds helped all of the grade 6 students understand that exhilarating from their surroundings and nature can be exciting.

You can visit these beautiful grounds anytime and have a guide tour you or you can enjoy these peaceful nature moments by yourself. Capture your memories by taking pictures or using a video camera. But just remember if you think learning is boring you will have to think again when you visit the Legislature grounds. A perfect place for some a family time. So will you visit the Legislature grounds with your family?

A Petrified tree stump. WOW!!!!

The flame to honour the fallen police and RCMP personal in Alberta.

TOUR OF THE OLD

By Aaliyah Walker

On October 4, 2010 the Kameyosek grade six class goes on a tour with Charles, the tour guide in the old Legislature building. Mrs. Gould said “By going to the legislature and taking a tour

we can learn so much more.” I am so with her.

But, how did they get a super fun tour like this?

Aiman said, “I think we got a super fun tour because Charles volunteered to tach us about the building.” Thanks Aiman for your opinion. I wish that I had taken notes.

Now a word from me, Aaliyah, you should totally go on a tour to the Legislature.

BLAST FROM THE PAST

By Braxton Bardzik

For the week the Grade 6 class from Kameyosek School attended the Legislature they experienced a most exciting adventure when they visited the Legislature library. They learned how government functions, and the history of the legislature building and its library, from the 1800s.

They travelled under the chamber itself to get to the library by going behind the grand staircase. They discovered much government history and that it was recorded and preserved from the early 1800s. We would not know as much as we do today about government politics if the library had not been developed or maintained. Would our government today function as well without the

knowledge and history of yesterday.

Beautiful architecture!

LUNCH AND GYM TIME

PROTOCOL

Tim was our protocol man. He spoke about the preparation that was necessary when preparing for dignitaries, heads of state and royalty. He told us that he never has a dress down day but must always wear a tie. Tim shared that skill with us.

MRS. GOULD'S THOUGHTS

What an amazing and memory filled week the students experienced. They explored from the top of the dome to the underground tunnels . The students will find that as they travel through life the memories of their experience will come drifting back as they say “I remember when.”

In the words of the students “Why can’t all learning be like this?” I guess I would like to have it that way as well. However, not all knowledge can be gained in this way and so the book learning happens as well.

I would like to say an extra big thanks to Mrs. Shaikh who accompanied and assisted us throughout the entire week. Without parent volunteers so much of what we do would not happen.

Also a BIG THANKS TO OUR PARENT ADVISORY COUNCIL WHO FUNDED THE WEEK FOR US AT A COST OF \$600.
