PART B: COMMENTS	
Comments *	When Lobbyists get to impact the decision, the revelations, the input of the general public, and nullify that public input, it needs to be forcibly, and completely denounced, denied and made criminal. This includes unions, special interest groups, ie environmentalists, activists, etc. This is not to say those people cannot interact publically with the citizenry, but must be forbidden to influence the will or directives given to politicians who are the employee of the citizenry.
