PART B: COMMENTS	
Comments *	<p>Everything this government touches is tainted by scandals and allegations of corruption and bribery, illegitimate leadership races, so EVERY action this government initiates is suspect, even this committee. As evidence in education, this government will force through whatever they want, no matter who complains or the vast amount of evidence their direction is against the wishes of the public. The oil industry has corrupted this government and the media in this province. This government immediately gave a five billion dollar kickback to oil after the election and has given another 8 in other money's, even for a dead pipeline. This government does nothing for the people, only corporations, so lobbyists already have too much power. We need money out politics and return the power to the people.</p>
