Subject: Review of Bill 203 - Fair Trading (Motor Vehicle Repair Pricing Protection for Consumers) Amendment Act, 2016
Date: Friday, October 7, 2016 3:20:13 PM

Committee:

I read this bill and email with interest and disbelief.

It behoves me however that we are again having citizens finding it important to make more laws for society! Do we not have enough laws yet dear people?

Stop the madness! Stop the madness!

Can we not just do business in a proper manner without the input of law and government? What are we teaching our young in schools? Oh, I know! Do what's good you, the individual, ie ME and the rest be dammed.

I believe we need to be teaching our young to be good people instead of later trying to fix STUPID, or create more laws to fix STUPID!!

Now back to this bill! The last thing we need is more legislation to interfere in my business!!!!

We run our automotive repair business already with written estimates, signed authorizations and the best warranty that I know: 36,000 kilometers or 3 years.

All parts are retained and client is asked if they want them! Not a single customer ever wants their old parts!!!

So where does this need for a bill come from??

Just because we have a few bad apples out there the rest of us need to suffer with more laws.

Stop the madness!

NO MORE LAWS, NO BILL 03

Sincerely,

Jerry Pasman
