---

No chance, no way in Hell this should be passed. In fact it should not even be up for discussion. This province is in a financial mess thanks to your inaction on real matters. Get your heads out of your collective butts and start acting on what's really important like canning your evil taxation methods and doing something for someone other than yourselves and union loyalists. Get it through your heads that "tax and spend" does not put a troubled economy back into solvency and putting people out of work is running backwards not forwards. But you leftist yoyo's wouldn't understand anything about fiscal intelligence.

Daryl Jones
