Mr. Carson

Re Bill 203.

This Bill is waste of tax payers money. This is nothing new to what the industry is mostly doing already. Most parts have a 90 day warranty if not a life time warranty. Most customers know they can have their olds parts back already, returning parts in a clean container is going to raise costs to customers, parts, oils , and clean containers will just end up in our landfills! Our industry recycles metal, plastic, oils, tires etc..

We spend thousands of dollars on diagnostic equipment each year and need to charge for this to stay educated with the change in vehicles. Each vehicle is different with different problems from different drivers and environments.

AMVIC is doing a very good job at dealing with issues.

Don't feel like you need to join the NDP ban wagon and have your name on a Bill you forced through. Don't have the same attitude as Notley, do the most damage in the short period of time that your in office!!! (Yes I did vote NDP! and like thousands of other Albertains I wish I had my vote back) You are Families and Communities Committee! There are thousands of Families that have lost or losing their jobs!!! Focus on what is really important. The people of Alberta!!!

Thank you.

Dennis Keil
