---

To whom it may concern,

I would like to express my thoughts and concerns with the proposed bill 203. This bill is trying to over power the already in place fair trading act and also A.M.V.I.C. the governing body of the automotive industry in Alberta. This bill is unfair to automotive service providers and also the consumer. If the government thinks this will create a fairer market place in the automotive industry they are dead wrong. I feel this bill will only make prices higher for the consumer if they want repair shops to include diagnostics in a estimate. Todays vehicle are driving computers and very hard to diagnose at times. It is unrealistic! This bill needs to be re-evaluated before it goes forward.

Respectfully
