Subject: Mental Health Amendment Act Review

Sir/Madam:

I would love to participate in the conversation on mental health. Previously I complained to this committee (previous government) but they never took my complaint about the [REDACTED] of my mom nor the other egregious wrongs done to her (and me). In fact mom is [REDACTED] and I have not seen her over 8 years now. The conduct of the Attorney General's office in our case will shock this legislature. The judges' conduct is even worse for about 8 of them [REDACTED] [REDACTED]. I invite you all to look at our case. If this legislature is serious about this review then I suggest consider my mom's case and off course there are many others such as FJR in *FJR (Dependent Adult)*, [2015 ABQB 112 \(CanLII\)](#). In this case, please look at how [REDACTED] this judge is to this gentleman and his rights. As well, look at how questionable the certification of incompetence is by these

their point men everywhere. These Acts must safeguard against empowering predatory gangs as is now the case. Most of all, victims must ultimately have a REAL avenue back to this legislature. We elect members of this legislature who ought to be accountable to us not just appear so. Others such as doctors, judges are appointed not elected and are not accountable to anyone but themselves and there is a lot of abuse of power taking place among them right now. I know of many judges who would make Judge [REDACTED] look like a good choir boy. The same goes for the attorney's in the Attorney General's Office. Do I have to even mention the [REDACTED]? I encountered all of them

I just want this legislature to know this Act allows the gang to abuse ordinary people for all they have to do is declare them mentally ill and their rights disappear and they cease to be persons (with Charter rights). Even the mentally ill still have rights including Charter rights and right now it is open season on vulnerable people

Please do not hesitate to contact me further

NOTE:

A word to the wise, it has been my experience that a submission such as this that can expose crooked government agents will likely be suppressed but know if I get the slightest idea that my submission is suppressed I will send this email to certain individuals directly.

This is just to add to what you already have. Just in case anyone on this committee disbelieved me in what I submitted, please read this elderly lady's horrific experience under a similar legislation and know this is more the norm than you know in Alberta. My question is what will this committee do under this review of this Act to prevent this kind of abuse? Again, it is the norm in Alberta and I can name names:
